EDUCATION

THE GEORGE WASHINGTON UNIVERSITY, School of Business

Washington, DC

Master of Science, Business Analytics

June 2027

- Areas of focus: forecasting, data visualization, machine learning, optimization, exploratory data analysis, predictive modeling, statistical analysis, KPI reporting, dashboard reporting, trend analysis, data cleaning, business intelligence

GEORGE MASON UNIVERSITY, School of Business

Fairfax, VA

Bachelor of Science, Management Information Systems

August 2024

RELEVANT PROJECTS

- **Enrollment Projection Tool:** Improved projection accuracy by 15% and cut reporting workload by 50%, as measured by forecast variance and hours saved, by building Python-based forecasting workflows and automated trend reports.
- **Mason Market:** Designed a full-stack campus marketplace to enable student-to-student transactions and real-time listings using Next.js, Firebase, and Tailwind CSS.
- **Responsible Machine Learning Capstone:** Reduced model deployment risk by quantifying fairness gaps across subgroups, as measured by adverse impact ratio and false positive/negative rates, to produce defensible machine learning outcomes.

EXPERIENCE

VACO

Fairfax, VA / Remote

Content Analyst

November 2024 – August 2025

- Reduced content review time by 30%, as measured by team throughput metrics, by redesigning the content tagging workflow in collaboration with analysts, QA, and operations teams.
- Maintained zero compliance violations across 5,000+ digital ads per batch by managing data imports/exports, validating records, and applying regulatory requirements.
- Ensured 90%+ content accuracy across 120+ daily queries and keywords by applying client guidelines, industry standards, and structured quality control processes.

INTO MASON

Fairfax, VA

Enrollment Projection Tool Intern

August 2023 – August 2024

- Improved enrollment projection accuracy by 15%, as measured by forecast-to-actual variance, by developing Python-based forecasting workflows to collect, clean, and validate student enrollment data.
- Reduced manual reporting workload by 50%, as measured by hours saved per reporting cycle, by automating data preparation pipelines using Python and pandas.
- Enabled data-driven enrollment decisions for marketing and cross-functional teams by building trend reports and visualizations using pandas and Matplotlib.

SALLIE MAE

Newcastle, DE / Remote

Credit Bureau Reporting Intern

June 2023 – August 2023

- Maintained 90%+ data accuracy across approximately 6.5 million customer records, as measured by industry-leading low reject and dispute rates, by monitoring reporting controls and flagging faulty data trends.
- Reduced reporting exceptions, as measured by exception database growth rate, by using SQL to identify and document illogical FCRA reporting scenarios across four national credit bureaus.
- Ensured daily data accuracy and KPI compliance by reconciling account-level information reported to Equifax, TransUnion, Experian, and Innovis.

GEORGE MASON IT SUPPORT

Fairfax, VA

Student Support Specialist

January 2022 – August 2023

- Achieved 90%+ issue resolution rate, as measured by ticket close rates, by providing technical support to students, faculty, and staff across phone, live chat, and walk-in channels.
- Resolved 40+ support tickets through TeamDynamix by diagnosing root causes, documenting issues, and closing cases in accordance with service level standards.

LEADERSHIP

KOREAN INTERNATIONAL STUDENT ASSOCIATION

Fairfax, VA

President / Advisor

August 2021 – August 2023

- Led 50+ members as President and Advisor, coordinating event logistics, member communication, and student outreach to support engagement and strengthen the KISA community.
- Organized cultural, networking, and career-focused events in collaboration with the Embassy and Consulate of Korea, and advised successor leaders to support organizational continuity.
